

If you, or someone you know, is an Australian female with a diagnosis of ASD, aged between 12 and 24, I need YOUR help!

In order to help the community understand how to support females with ASD through social challenges, we need to let the professionals know what it is you want and need. This is your chance to have YOUR say!

I am conducting a short study, where you can log on to a PRIVATE online forum, and chat with other girls with ASD (no neurotypicals allowed), and answer some basic questions. All chatting will occur online, and all girls in the study will use a fake name.

This study is designed to gather your thoughts, without any stress. You can join in from your own home, anytime of day you like, as often as you like. You do not need to meet with anyone in the study, or talk on the telephone. This is an online study only.

If you spend time on the internet, would like to connect and chat informally to other girls your age with ASD, and help us understand your thoughts and ideas, please contact me on Rebecca.vinefoggo@griffithuni.edu.au for an information pack.

I really want to hear from you!
